

NEXT GENERATION

Physician eSign Portal

Improving Collaboration and Care Coordination

THE challenge

In today's healthcare environment, caring for your patients often extends beyond the hospital or your office walls. As a physician, you need a better way to manage your patients' home healthcare plans accurately and efficiently—without adding more paperwork or staff.

THE solution

Visiting Nurse Health System's Physician eSign Portal. Introducing a high quality, easy to use, online system with access to information and orders for your patients requiring home healthcare. The Physician eSign Portal features:

- **Direct access** to your portal account through email notifications.
- The ability to manually **reset your login password** at any time.
- Use of your **smartphone or tablet** to access, view and sign orders.
- Easy **viewing and printing** of orders.
- **Secondary account access** for key office staff to review physician orders.
- **Compatibility with all internet browsers** (except Internet Explorer 9).
- **Email notification** when a document requires your signature, including a link to the home page.
- **On-call phone support** for all users of the portal.

THE BENEFITS

Simply stated, Visiting Nurse Health System's Physician eSign Portal enables the physician to easily review and sign home health orders. When using the Physician eSign Portal, you will experience:

- An interface that allows for **email notification** of documents requiring signature, **simple and intuitive access** for physicians and physician office staff and data and signature capture capability.
- **Multiple security controls** to restrict access both internally to your users and externally to those assigned physician accounts. All physician portal password information is also stored in an encrypted format.
- Reduced paper usage since documents are handled electronically.
- Web-based access via **smart phones or tablets** that requires no additional equipment expenditures.
- The ability to use your email and custom password to login.
- **No fees** for the Physician eSign Portal which gives you an opportunity to try it out with no risk and lots of reward.

our mission

**TO IMPROVE THE LIVES
OF THOSE WE SERVE**

ABOUT US

Founded in 1948, Visiting Nurse Health System is a **nonprofit home healthcare organization**, serving people in 28 counties throughout greater Atlanta. Visiting Nurse/Hospice Atlanta serves pediatric and adult hospice patients in their homes, or in the Andrew and Eula Carlos Hospice Atlanta Center located in Brookhaven. In addition to **home healthcare, private home care and hospice services**, Visiting Nurse offers long-term care at home with programs such as **Community Care Service Program (CCSP), Service Options Using Resources in a Community Environment (SOURCE) and Home and Community Based Services (HCBS)**, providing specialized services to the Atlanta community.

Every year, we provide approximately **\$3 million in charity care** to the greater Atlanta community. We rely on the thoughtful donations of individuals, area foundations, and partner organizations. This allows us to serve hundreds of patients who lack the ability to pay for home healthcare and hospice.

As a leader in the field and one of the most progressive home healthcare and hospice organizations in the industry, Visiting Nurse Health System provides **constant cost-effective care with the utmost compassion**. We're committed to providing care focused on helping our patients remain as independent as possible. Equally important, we have a commitment to the communities we serve, and to the extent we have resources available, to providing quality care to all who need it.
